7.3 Give two best practice of the institution

1. The news reading and weekly assignment for strengthening general awareness and writing skills

Objectives:To strengthen the general awareness of students, to improve the reporting ability of the students, to make them ready for competitive exams in future

The context: to a majority of Keralites, newspaper is either a luxury or they live in rural areas beyond the network of dailies. The decline in the functioning of rural libraries and reading rooms with the advent of TV is a notable block to rural students' reading habit. From academic year 1996 – 97 , the programme is in full swing and the results are encouraging .

Practice : The programme has following practices to achieve its objectives

- 1.An orientation programme on the need for general reading
- 2.A refresher programme on methodology of reading
- 3.A one day parents meeting to make them aware of the programme
- 4.Arrange subscription of an English daily at home for every student
- 5.Announcement of assignment schedule

Evidence of success : The programme is well appreciated by students, alumni, and parents. The programme has contributed to students' progression to higher education and employment. The self confidence it generated has motivated many students to turn into entrepreneurs

2.Value based education: In keeping with the vision and mission of the college, Value based education is imparted to students to make them morally upright and socially committed. The college stands for character formation based on the love of God

and service of man as modeled by Sree Narayana Guru Devan, to produce morally upright, socially committed and spiritually inspired young men and women

Goal : The major goal is to inculcate moral values in students to mould them to become socially responsible and committed citizens. The specific objectives are,

1. To prepare students to be committed to a life of community service as an active person
2. To impart human values and social attributes to the students
3. To contribute to the less privileged in society
4. To equip students to practice sustainable and eco friendly life style

5. To develop philosophy of life as Guru Devan has taught

3. Context

The present formal education system does not provide awareness for students to live in harmony with society and to imbibe moral and spiritual values. Without social responsibility, education is not complete. In order to fill this void and to mould the students as socially committed citizens, the college encourages the students to merge in various activities that lead to their holistic development

4. The Practice

To promote and strengthen values in our students for a better future , the following activities are conducted : the daily classes begin with prayer (Daivadsakam – the prayer penned by Sree Narayana Gurudevan ; the all religious prayer is celebrating its 100 years this year) Prayer at the beginning of any programme, spiritual classes based on teaching of Gurudevan, life guidance seminar, counselling sessions, legal awareness classes, environmental protection initiatives, turn green campaigns, waste management initiatives and premarital guidance courses for outgoing students. The college also observes all important days to integrate students to the community. The college organizes a variety of programmes:

Evidence of success: Student benefit from this innovative practice and they are enlightened by the talks related to ethics and moral values. They develop the habit of meditating which helps to sooth their mind. We hope that this type of practice would help them to lead a peaceful life

7.4 Contribution to environmental awareness/protection

To raise public awareness about environmental protection and create awareness among our students on conservations of natural resources, The College observes world environmental day, ozone day, earth day and world food day. Film shows, distributions of saplings etc are organized . In association with the Department of Forest, Police and gramapanchayath ,opportunities are provided to the students to interact with environmental scientists and activists and to know of their experience and scientific knowledge. The college takes up eco projects on various environmental issues like waste management, rain water harvesting, ground water re-charging, vermin composting etc.

7.5 Whether environmental audit was conducted? No
